

MIRIAM ROZENBAUM

Software Developer & UI/UX Designer

ABOUT

As a skilled and determined software developer and UI/UX designer, it is my objective to obtain a full-time position that will build my expertise to further advance my career. I am hardworking, passionate about working in technology and design, meticulous in problem solving, team work, and confident that I can achieve any goal set before me.

EDUCATION

Nashville Software School, Nashville TN
January 2017 - June 2017
Web Software Developer

May 2017 - August 2017
UI/UX Digital Product Designer

EXPERIENCE

- Daily hands on application of OOP fundamentals through group and individual projects
- Created single page applications in JavaScript in the Angular framework as well as HTML, CSS, Bootstrap, and Materialize. Worked with jQuery for JavaScript libraries
- Utilized Grunt to automate bundling of modules, JavaScript linting, and compiling Sass. Project management/tracking: with Trello, GitHub Issue Tracking, GitHub Organization, and Slack
- Solution Design: white-boarding, wireframes, ERD Diagram's, and Mockups
- Leveraged Django for creating and editing MVC applications
- Deployed applications through Firebase and GitHub
- Source code/version control with Git/GitHub
- Created servers and RESTful API's with Django REST framework
- Stored and Retrieved database information in Firebase and SQLite
- Practiced TDD with Python's unit test framework
- Translating concepts into wireframes and mockups that lead to intuitive user experiences
- Driving a user experience from start-to-finish that delivers results, connects emotionally, and provides the user with an easy and delightful experience using the product
- Creating wireframes, storyboards, sitemaps and screen flow
- Taking a project from basic wireframes to full UI
- Creating and revising information architecture documents and diagrams including but not limited to: content diagrams, content maps, wire frame diagrams, comprehensive diagrams and static prototypes
- Review user adoption of deliverables and acceptance testing and analyze user feedback and activity, and iterate to enhance the user experience.
- Ensure all versions of project UX/UI documents are complete, current, and stored/ archived appropriately.
- Working with client and project teams to complete the information architecture and interface development.
- processes for new production projects including site map, wireframe layout, and template.
