debugging

Nashville Software School, Nashville, TN —

UI/UX Digital Product Designer
MAY 2017 - AUG 2017

• Translating concepts into wireframes and mockups
 that lead to intuitive user experiences
• Driving a user experience from start-to-finish that
delivers results, connects emotionally, and provides
the user with an easy and delightful experience using
the product
• Creating wireframes, storyboards, sitemaps and
screen flows
• Taking a project from basic wireframes to full UI
• Creating and revising information architecture
documents and diagrams including but not limited to:
 • content diagrams
• content maps
• wire frame diagrams
• comprehensive diagrams and static prototypes
• Review user adoption of deliverables and acceptance
testing and analyze user feedback and activity, and
iterate to enhance the user experience.
• Ensure all versions of project UI/UX documents are
complete, current, and stored/ archived appropriately.
• Working with client and project teams to complete
the information architecture and interface
development.
• Processes for new production projects including site
map, wireframe layout, and template.

for introducing the idea of using AI as a way of

communicating with users.

PROJECTS

123 Garage Door Experts — *https://123garagedoorexperts.com/ (Company link)*

Pearl Lash Extensions — *https://pearllashextensions.com/ (Company link)*
Pearl Lash is an ecommerce website built originally in AngularJS, I stored user information
via Firebase, and styled with Bootstrap.

My Closet App —
My Closet is built with Python and Django and
styled with Materialize. Users should add items to their
closet and categorize their items for their convenience
by category.
